DINUKRISHNA A

Data Analyst

Kerala, India | +91 9747602898 | dinukrishnadk40@gmail.com | www.linkedin.com/in/dinukrishnaofficial | GitHub

SUMMARY

Detail-oriented BCA graduate with practical knowledge of Data Analytics using Python, MySQL, Power BI, and Microsoft Excel. Hands-on experience analyzing datasets through projects involving data extraction, data cleaning, preprocessing, transformation, exploratory data analysis (EDA), and data visualization.

Proficient in using Python libraries such as Pandas, NumPy, and Matplotlib, along with MySQL and Power BI, to transform raw data into meaningful insights. Skilled in developing interactive dashboards, identifying data patterns and trends, and presenting analytical findings to support data-driven business decisions.

SKILLS

Data Analytics & Business Intelligence
Data Analysis, Exploratory Data Analysis (EDA), Data Cleaning, Data Preprocessing, Data Transformation, Data Visualization, Business Intelligence, Dashboard Development, KPI Reporting, Trend Analysis, Business Reporting
Programming & Data Analysis
Python, SQL, Data Analysis, Data Manipulation, Data Extraction, Data Cleaning, Data Preprocessing
Python Libraries
Pandas, NumPy, Matplotlib, Seaborn
Database Management
MySQL, SQL Queries, Joins, Subqueries, Data Filtering, Database Management
Statistical Analysis
Exploratory Data Analysis (EDA), Descriptive Statistics, Statistical Analysis, Correlation Analysis, Data Interpretation, Pattern Identification
Excel Skills
Pivot Tables, VLOOKUP, XLOOKUP, IF Functions, Conditional Formatting, Charts, Data Cleaning
Professional Skills
Analytical Thinking, Problem-Solving, Critical Thinking, Communication, Presentation Skills, Documentation, Attention to Detail, Collaboration, Continuous Learning

TECHNICAL SKILLS
Programming Languages: Python, SQL
Data Analytics: Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Data Visualization
Business Intelligence: Microsoft Power BI, Dashboard Development
Database Management: MySQL, SQL Queries
Microsoft Office: Microsoft Excel, Pivot Tables, Charts

PROJECTS

AI Impact on Jobs & Employee Productivity | Excel, Power BI | GitHub

• Analyzed 2,000+ employee records to understand the impact of Artificial Intelligence on job roles, salary trends, employee productivity, and automation risks across different industries.
• Performed data cleaning and preprocessing using Microsoft Excel, including duplicate removal, missing value handling, data standardization, and calculated column creation.
• Developed calculated fields such as Salary Change, Salary Change %, Experience Level, and AI Impact Category.
• Created DAX measures in Power BI to calculate total employees, average salary, productivity changes, and job satisfaction.
• Designed interactive Power BI dashboards using KPI cards, charts, tables, and slicers to visualize workforce analytics.
• Identified key insights related to AI adoption, automation risks, productivity improvements, and salary trends to support data-driven workforce decisions.

Exploratory Data Analysis of Retail Transactions | Python | GitHub

• Analyzed 100,000 retail transaction records to explore sales performance, product category trends, payment methods, transaction patterns, and customer purchasing behavior.
• Performed data cleaning and preprocessing using Pandas, including missing value handling, duplicate checking, data type conversion, column standardization, and categorical value cleaning.
• Created derived features by extracting year, month, month name, day, and day of the week from transaction dates to support time-based sales analysis.
• Conducted univariate, bivariate, and multivariate analysis using descriptive statistics, groupby operations, frequency distributions, and correlation analysis.
• Developed data visualizations using Matplotlib, Seaborn, and Plotly, including bar charts, histograms, box plots, scatter plots, line charts, and correlation heatmaps.
• Identified key business insights related to product category performance, payment method preferences, monthly sales trends, transaction values, and relationships between quantity, price, discounts, and total sales.

EDUCATION

Bachelor of Computer Applications (BCA)

Bengaluru City University • Bengaluru, Karnataka, India • 2022 - 2025

CERTIFICATION & PROFESSIONAL DEVELOPMENT

AI-Driven Data Analytics Programme – Entri Software Pvt Ltd | May 2026 – Present | Status: In progress

• Illinois Institute of Technology (Illinois Tech), USA

• National Skill Development Corporation (NSDC)

• Excel: data cleaning, formulas, descriptive analysis, PivotTables, charts and data visualisation.
• Power BI: Power Query transformations, data modelling, relationships, DAX measures, interactive reports and dashboards.
• MySQL: relational database concepts, SQL queries, joins, built-in functions and data retrieval.
• Python: programming fundamentals, data structures, Pandas and NumPy for data manipulation, and visualisation with Matplotlib and Seaborn.
• Practical assignments and project-based learning in data analytics.

Languages

• English - Professional Working Proficiency
• Malayalam - Native
• Tamil - Conversational
• Hindi - Basic Proficiency
